

450DB

Vertically long with a double opening, the EcoSmart Fire 450DB Firebox has been created with a wide variety of settings in mind. Versatility is a key feature of the 450DB, and the see-through effect helps enhance the feeling of space within interiors, whether they be in apartments, houses or commercial premises including offices, bars, cafes and restaurants.

The toughened glass panel at the rear of the 450DB enables this firebox to be used to create a window effect or to maximise space – or simply to make a statement, regardless of its location. And with its toughened glass screen affixed to the front the view of the mesmerising flame isn't compromised.
