Design
Louise Campbell

Concept
Campbell 210 is perfect for low-hanging lighting above tables, for instance. Light refraction in nature inspired the pendant design. The light rays refract by passing through two separate glass shades, and the frosted stripes add a three-dimensional effect to the fixture while also shielding off direct glare. The staggered sand-blasted stripes aid in emanating diffuse light.

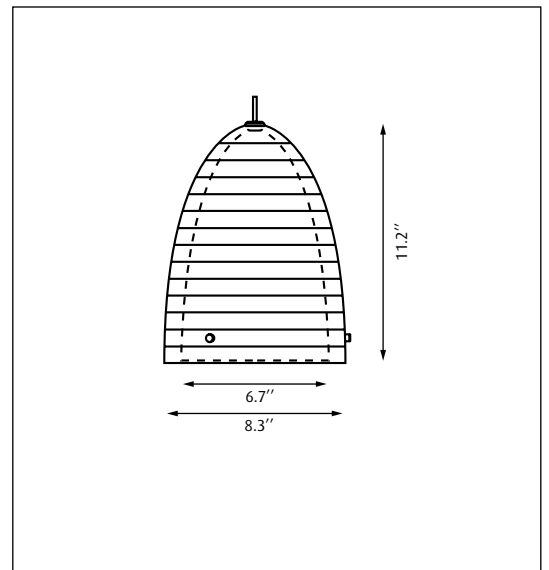

Finish
Clear glass with sandblasted stripes.

Material
Shades: Mouth-blown clear glass with sandblasted stripes.

Mounting
Suspension type: 1x stainless steel aircraft cable. Suspension length: 12'. Canopy: White. Cord type: 3-conductor, 18 AWG white PVC power cord.

Weight
Max. 7 lbs.

Class
cUL, Dry location. IBEW.

Product code	Light source	Voltage	Finish
CAM-210-P	1x40W Reflektor R14 interm. US	120V	STRIPED GLASS

Info notes:
The comparable EU version has the following classification: Ingress Protection Code: IP20.
