

Sphere Table

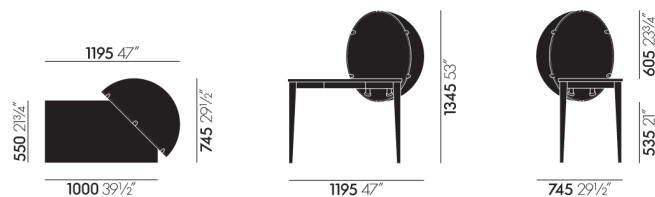

The Sphere Table was developed in conjunction with the redesign of the North Delegates Lounge at the United Nations headquarters in New York. As part of a large-scale programme to renovate the building's interior, the project was led by Hella Jongerius, who created special furniture pieces for the lounge. The Sphere Table is the first of these pieces to enter production at Vitra.

The Sphere Table combines a solid wood table with a large dome-shaped 'bubble' made of opalescent acrylic glass. The hemispherical screen can be attached to either the left or right side of the table, making it highly adaptable to individual needs. For this reason, the Sphere Table is ideal for the home office, where the bubble creates a private and sheltered space within a room. The Sphere Table combines a futuristic-looking sphere with the familiar archetype of a traditional table and thus makes a statement in any environment.

Materials

- **Table:** solid wood with oiled finish, natural oak.
- **Hemispherical shell and drawer bottom:** dyed-through acrylic glass.
- **Metal elements:** powder-coated steel, matched to shell colour.
